WARRANT FOR TOWN MEETING STATE OF NEW HAMPSHIRE

To the Inhabitants of the Town of Rollinsford in the County of Strafford, in said State, qualified to vote in town affairs:

You are hereby notified to meet at Town Hall in said town on Tuesday, the tenth (10) day of March next, at ten o'clock in the forenoon, to act upon the following subjects:

- ART. 1. To bring in your ballots for Town Clerk, Town Treasurer, one Selectman for a term of three years, one Road Agent, and Chief of Fire Department.
- ART. 2. To choose all other necessary town officers for the ensuing year.
- ART. 3. To raise such sum of money as may be necessary to defray town charges for the ensuing year and make appropriations for the same.
- ART. 4. To see what percentage, if any, the town will vote to discount all taxes paid on or before the first of August next, excepting poll taxes.
- ART. 5. To see if the town will vote to raise and appropriate the sum of two hundred twenty-two dollars and ninety-four cents (\$222.94), and State will add eight hundred ninety-one dollars and seventy-six cents (\$891.76) to resurface Class 5 roads.

- ART. 6. To see if the voters of the Town of Rollinsford will vote to raise and appropriate the sum of seven hundred dollars (\$700.00) for the purpose of equipping their Ford fire truck with the necessary fire fighting units so as to place same in commission, through their Fire Department, for the protection of the Town's property from fire.
(By Petition.)
- ART. 7. To see if the voters of the Town of Rollinsford will authorize the Selectmen to borrow money in anticipation of taxes.
- ART. 8. To see if the town will authorize the Selectmen to administer or dispose of any real estate acquired by the town through Tax Collector's deeds.
- ART. 9. To transact any further business that may legally come before said meeting.

Appropriations will begin at eleven (11) o'clock sharp.

Given under our hands and seal this twenty-fourth day of February, in the year of our Lord, nineteen hundred and thirty-six.

FORREST L. NUTTER,
EDWARD J. HUDON,
RICHARD J. COLBATH,

Selectmen of Rollinsford.

Respectfully submitted,

ARTHUR D. CARON,

Town Treasurer.

The undersigned auditors of the Town of Rollinsford accounts have examined the books of the Selectmen, Town Treasurer, Town Clerk, Tax Collector, Highway Agent, for the year ending January 31, 1936 and find all cash entries sustained by appropriate vouchers and castings correctly made and footings agree.

GRACIA R. NOLETTE,

EVERETT F. TOZIER,

Auditors.

REPORT OF CHIEF ENGINEER AND FOREST FIRE WARDEN

PEOPLE OF ROLLINSFORD:

Again the time arrives when it is my duty to render an annual report relative to activities and conditions of your fire department, its equipment and supplies. Also recommend necessary future improvements and additions which will cause this department to function for all purposes such as is your right and pleasure to expect and with your assistance and cooperation it is my duty and pleasure to maintain.

It is much less expensive to prevent fires than to extinguish them. Losses from fire, in most cases, are permanent losses from which revenue for the towns future sources of assessment for taxes cannot be forth-coming.

It is granted by everybody that a fire department in our town is an asset and must be adequately manned, equipped and supplied to properly function for the best interests of all the people when called upon to respond to a summons for fire, both in the village where hydrants and water mains are maintained for a water supply and outside in our rural districts where the water supply is not to be had.

During my years as chief of your fire department it has been my pleasure to receive your cooperation, not only in matters pertaining to the extinguishing of fires, but in the timely elimination of many serious fire hazards, all made possible by working together in all respects pertaining to fire and its hazards. Also do I, and your fire department, appreciate the fact that your fire department budget from year to year has made it possible for

us to function to a degree wherein your property losses by fire have not been sacrificed by false economy; through neglect or otherwise, to maintain your fire apparatus, its equipment and supplies, as has been recommended from year to year by the chief engineer.

The past year has seen many changes for the better in matters pertaining to our department. The facilities for housing your apparatus at the station have been greatly improved by enlarging the interior and installing a new cement floor, now providing sufficient space to conveniently house two or more trucks. The station inside has been newly painted and the old plaster ceiling has been replaced by an appropriate and serviceable job. New water mains have been laid, both in and out of the village, from which six new fire hydrants have been installed. These six new hydrants cover a large area and assure fire protection to many home owners not before having any water available for protection from fire, so to speak.

Acknowledging the above facts and still desiring to co-operate in all ways pertaining to economy I desire to recommend means whereby your fire department may become better qualified to provide more and better protection to home owners in the out-lying districts. The way is now open to do just that. Here's how: A small appropriation to be expended for a 200 gallon water tank with suitable draft and booster pump, with fittings, mounted on Ford truck recently purchased by the town upon my recommendation, and otherwise equipped with ladders, axes, pony chemicals, etc., now in possession of your fire department would supply the long needed answer to our rural fire protection, because it would be possible to carry a good supply of water right to the fire upon leaving the station. A truck so equipped would lessen the burden now placed upon your old and heavier White truck.

It is our desire and ambition to serve those out of reach of water mains or hydrants and to afford them fire protection that sets a new low in cost and a new high mark in performance. Old ideas die hard. To send large pumpers where there are no mains, no hydrants and but little water available is being discontinued in favor of light, fast, rural fire apparatus that can carry their own water with the ability to also use conservatively and efficiently any water obtainable on, or nearby, farms, etc.

It is now recognized by thinking fire chiefs that light weight trucks, carrying 100 or 200 gallons of water, with booster and draft pump attached, can arrive and extinguish 80 to 90 per cent of all fires and before big apparatus could arrive, connect up, and lay hose lines, the fire is under control or entirely extinguished. We all understand well that the big blaze, the most destructive fire, was only a small fire at the start and dies quickly under from 100 to 300 gallons of water. Delay and perhaps a thousand gallons a minute could not get it under control. Only relatively speaking are booster fire engines small. In truth, booster apparatus is in a class by itself—designed to carry water, to speed safely, to use available water economically, to get into action instantly and to reach fires over soft ground impossible for heavy trucks. If our townspeople will support this progressive and inexpensive proposition I am positive that in a very short time such cooperation and support will be fully demonstrated by services rendered for the town's welfare in extinguishing fires much quicker than is now possible, and especially so in the outlying communities where water is scarce—and all at little cost.

O yes! We still need and must maintain our larger pumper for the fires located in places wherein a conflagration might exist and where water mains and hydrants render it possible and desirable to use same when serious conditions arise.

With the \$300.00 appropriation voted last town meeting we have added 350 feet of double jacket, two and one-half inch hose to our supply and same is a great asset to your fire fighting defense. Our present two and one-half inch hose supply of 2,800 feet is quite sufficient at the present time.

A new battery has been installed in our truck and a new double female steamer connection has been added to enable your department to connect up to our newly installed hydrants for pumping purposes and also enables your fire department to work with, and hook up to, apparatus and other equipment in surrounding cities and towns having hydrants with steamer outlets.

Our one serious fire during the past year covered practically all the loss suffered by the town from fire. This fire occurred late at night and in my opinion was incendiary. Investigators from the Attorney General's Office and the office of the National Board of Fire Underwriters were called in for investigation. Although considerable incriminating evidence was uncovered by these investigators, sufficient evidence could not be procured, in their opinion, to arrest the suspect. It was, however, definitely established in the minds of all concerned that this fire was of incendiary origin.

We have responded to eleven grass and brush fires this last year with slight financial losses recorded.

Many town residents continue to kindle fires in the open without the necessary permit from the fire warden. I desire to again warn these offenders of the state law, requiring one to procure a permit before kindling a fire, that if they get into serious trouble after disregarding the law it will be just too bad for them. My advice to every one desiring to kindle a fire is: Procure the necessary permit and thereby protect your act within the law.

The uncut hayfields in the fall of the past year were not so numerous as in former years, which of course meant less serious hazards to contend with and not as many alarms for fires due to this particular hazard.

Although it was voted to cut a road in to the Caswell Brook, so called, off the turnpike to allow our pumper to take water from this brook in case of fire nothing has been done as yet by the road commissioner to carry out the will of the people at our last town meeting. Many brooks by the roadside in our outlying districts could be made accessible to our truck pumper at very little cost if the town, or the home owners in the vicinity of these brooks would spend a small sum to dam all such streams and derive the benefit therefrom in creating a water supply sufficient to cope with fire.

I am herein inclosing, in part, a copy of a letter received from the State Forresters' Office in Concord.

January 25, 1936

Mr. Raymond C. Chase
Forest Fire Warden
Town of Rollinsford
Salmon Falls, N. H.

Dear Mr. Chase:

You have established a good record in Rollinsford and my sincere wish is that you may continue to enjoy such good fortune. We all know that some circumstances can get beyond the control of the best organization but there is no question about the value of an interested and efficient department to keep down fire losses.

Sincerely yours,

E. J. COUTURE

For the State Forester.

That is not taken by me as a personal complement but it includes the whole department and all our townspeople who are cooperating to attain this good record. It sure is good to know that such cooperation is appreciated by many of our state officials, and it is pleasing to have them express their opinion.

Cooperation between fire departments of neighboring cities and towns in assisting one another when called upon cannot be improved, and it is with much thanks that we acknowledge all assistance rendered our fire department in the past by neighboring chiefs and their departments.

Chimney fires have been the cause of most of our alarms in the past. Just why people will ignore a dirty stove funnel or chimney flue, rather than take a few moments and make sure that same are clean and safe, is a mystery. A large percentage of all house fires are caused from chimney fires, which very easily could be avoided if funnels and chimneys were only properly cared for and kept clean. Give your stove funnels and chimney flues regular attention at least twice a year and by so doing eliminate the danger of losing your home and its contents. Make a special effort to attend to these serious fire hazards.

By working together in the future, as in the past, with the same effort and cooperation between your fire department and townspeople the small as well as the more serious fire hazards can be eliminated, making our town a safer and better place in which to reside.

For the many courtesies extended our department by the townspeople and officials, for the financial support received in the maintenance of this department and its equipment, for the serious consideration and assistance given to matters pertaining to fire hazards and their elimination, for all cooperation of the slightest instance in the

past and soliciting the same for the town's welfare in the future, I sincerely thank everybody and wish all a happy and prosperous New Year.

Respectfully submitted,

RAYMOND C. CHASE,

Chief Engineer and Forest Fire Warden.

Rollinsford Fire Department.

January 31, 1936

Note: Having been fortunate in the past in avoiding accidents when rolling to or from a fire with the apparatus is no excuse for not having the same insured. Accidents can and will happen in the best of families. Its a business proposition, financially, for the town to have their fire apparatus properly insured to cover all claims which might arise due to unavoidable causes. Your fire apparatus at the present time carries no insurance protection. A few dollars wisely expended for fire truck insurance today, might be the means of saving the taxpayers thousands of dollars in the future, should serious accidents occur. Its a business proposition. Insure your fire trucks against accident.

REPORT OF THE SUPERINTENDENT OF SCHOOLS

TO THE SCHOOL BOARD AND CITIZENS OF ROLLINSFORD:

I have the honor to submit my eighth annual report. Every year I have urged the erection of a new school building and this year it gives me great pleasure to write that our urging is about to achieve results.

Sixteen pupils graduated last June from the eighth grade. Donald Grant received the Good Citizenship medal awarded by the New Hampshire Sons of the American Revolution; Herbert Lord and Thelma Tozier received the medals awarded by the Wm. Martel Post of the American Legion for high rank in scholarship.

The enrollment this year remains about the same as last year. Twenty-three pupils are attending Dover High School and twenty-five are attending Berwick Academy. No change has been made in the teaching force. You will note from the table of statistics that the number of tardinesses has been reduced to the lowest figure in five years. The number of half days that the schools were actually in session was lowered by seven, because of closing school for inclement weather.

No Federal Funds are available this year for free milk, but local funds have been secured through the Red Cross which permits a limited number of bottles to be distributed. Parents realizing the value of a milk lunch are buying it through the schools. The Nurse continues to

have many of the defects of childhood remedied and all those pupils needing glasses now have them.

Last winter, Miss Margaret Thomas was employed to teach an adult evening school, her salary being paid from Federal Funds. Classes met from 6:00 to 7:30 and from 7:30 to 9 o'clock for five nights a week. Over 30 were enrolled, some in Beginning English and some in Advanced English. A great deal of interest was shown. When the school re-opened this year on January 6, 26 were enrolled. One gentleman enrolled is seventy-three years of age. One gentleman last June, aged 57 years, had learned enough English to enable him to secure a job where a knowledge of English was required. The school will probably continue until the opening of the spring term of the public schools.

If a new school house is provided, no repairs will be needed on the old buildings and I recommend none. It is hoped that when facilities have been provided for Manual Training and Home Economics that these subjects may be added to those already taught. I recommend that a Junior High School be established consisting of grades 7, 8, and 9. That is, that the schools be re-organized on the so-called six-three-three plan, which means 6 years Elementary, 3 years Junior High School, and 3 years Senior High School. Pupils entering high at Dover and Berwick Academy would do so in the second year or 10th grade. This plan, if adopted, would save money for the district in high school tuition and transportation. This year's eighth grades number 9, so a ninth grade next year would probably be a little larger because of pupils from the Parochial Schools. If this new program cannot be adopted for use in September, 1936 this plan should be given serious consideration with a possibility of putting it into effect in 1937.

We feel that the schools have gone forward but that the time is opportune for a re-organization.

Teachers and Superintendent appreciate the loyal support given them by the School Board.

Respectfully submitted,

HOWARD L. WINSLOW,

Superintendent of Schools.

TEACHERS AND ENROLLMENT, 1935-1936

Miss Anne Brown, Franklin, Grade 1, 9 enrolled; Grade 2, 4 enrolled	13
Miss Bernice Doherty, Franklin, Grade 3, 6 enrolled; Grade 4, 5 enrolled	11
